It is a beginning of a new chapter.

Finwood has been designed and developed with beautiful landscaping, with tree-lined walkways, generous green spaces, and gardens that will mature alongside the community

SMARTER LIVING NATURALLY

Finwood has been designed with sustainability in mind and is targeting EDGE certification upon completion — using less energy and water to help you live smarter and save more.

EDGE Certification is an internationally recognised green-building standard. That means lower utility bills, a more comfortable home, and financial perks when securing finance.

WHY EDGE MAKES A DIFFERENCE

Energy, water & material savings of at least 20% compared to standard buildings

Lower running costs, thanks to solar geysers, water-saving fittings, efficient lighting, and groundwater irrigation

Access to green home loans with benefits like a reduced interest rate

Lower monthly costs, a lighter footprint, and a home that supports the way you want to live - now and into the future

A photograph of a modern residential development. In the foreground, a paved walkway leads to a landscaped area with various green plants and a small stream. A large, mature tree with a thick trunk and dense foliage stands prominently on the right. In the background, a multi-story apartment building with a grey facade and large windows is visible. The scene is set during the golden hour, with warm sunlight filtering through the trees. A blue circular graphic is overlaid on the right side of the image, containing text.

Life flows differently here. A sculpted water system, from waterways to a peaceful Eco Pond, works quietly behind the scenes to keep Finwood green and grounded.

PEACE OF MIND BUILT IN

At Finwood, feeling safe comes standard.

Finwood is secured with electric perimeter fencing, access control, and CCTV with 24-hour off-site monitoring for peace of mind. While Burgundy Estate is an open neighbourhood, the community is quietly protected, with multiple layers of security that support day-to-day wellbeing.

BURGUNDY ESTATE SNAPSHOT

Since Rabie Property Developers' first project in Burgundy Estate, the area has seen remarkable growth:

- Property values nearly doubled, from R16,000/sqm in 2017 to R30,000/sqm in 2025.
- From 2023 to 2025, average new development selling prices increased by 30%.
- Resale values have increased with limited stock, so properties sell quickly

Strong Rental Demand

- New developments are achieving upwards of R12,000/month for 1-bed apartments and R16,000/month for 2-beds.
- Rental escalations of around 8% per year are expected during Finwood's construction phase, further boosting returns.

Burgundy Estate has become one of Cape Town's most attractive investment destinations, offering a balance of modern living, safety, and convenience. The area continues to grow in popularity as Rabie Property Developers expand and enhance the precinct, creating a thriving, multi-generational community. With strong demand from both buyers and tenants, properties in the estate are consistently held and sought after, reflecting confidence in long-term value. Rental appetite remains high, supported by the lifestyle and amenities on offer. For investors, Burgundy Estate represents stability, growth, and the opportunity to be part of one of Cape Town's most successful suburbs.
